U.S. Nuclear Regulatory Commission  
ATTN: Document Control Desk  
Washington, D.C. 20555

Subject: McGuire Nuclear Station  
Docket Nos. 50-369, 370  
Deletion of Appendix B, Environmental Protection Plan, Supplement 1

Gentlemen:

By letter dated November 2, 1994, Duke Power Company submitted a proposed license amendment for Catawba and McGuire Nuclear Stations which deleted Appendix B, the Environmental Protection Plan. Subsequently, during conversations with a member of your staff, it was requested that an updated copy of the facility operating licenses NPF-9 and NPF-17 for McGuire Nuclear Station Units 1 and 2, respectively, be submitted. Attached, find the revised updated copy of the facility operating licenses which will supercede the marked-up facility operating license pages in the original submittal. The Technical Discussion, No Significant Hazards and the Environmental Impact Analysis contained in the original submittal remain valid.

Pursuant to 10 CFR 50.91(b)(1), a copy of this amendment request has been provided to the appropriate North Carolina state official.

Should there be any questions concerning this matter or if additional information is required, please call A.D. Jones-Young at (704) 382-3154.

Very truly yours,

*M. S. Tuckman*

M. S. Tuckman  
Senior Vice-President  
Nuclear Generation

# McGuire Unit 1 Facility Operating License

- 3 -

EPP, Supplement 1

- (3) Pursuant to the Act and 10 CFR Parts 30, 40 and 70 to receive, possess and use at any time any byproduct, source and special nuclear material as sealed neutron sources for reactor startup, sealed sources for reactor instrumentation and radiation monitoring equipment calibration, and as fission detectors in amounts as required;
- (4) Pursuant to the Act and 10 CFR Parts 30, 40 and 70, to receive, possess and use in amounts as required any byproduct, source or special nuclear material without restriction to chemical or physical form, for sample analysis or instrument calibration or associated with radioactive apparatus or components; and
- (5) Pursuant to the Act and 10 CFR Parts 30, 40 and 70 to possess, but not separate, such byproduct and special nuclear materials as may be produced by the operation of McGuire Nuclear Station, Units 1 and 2.
- (6) Pursuant to the Act and 10 CFR Parts 30 and 40, to receive, possess and process for release or transfer such byproduct material as may be produced by the Duke Power Company Training and Technology Center.

Amdt.  
#25  
10-19-83

C. This license shall be deemed to contain and is subject to the conditions specified in the Commission's regulations set forth in 10 CFR Chapter I and is subject to all applicable provisions of the Act and to the rules, regulations, and orders of the Commission now or hereafter in effect; and is subject to the additional conditions specified or incorporated below:

## (1) Maximum Power Level

The licensee is authorized to operate the facility at reactor core power levels not in excess of 3411 megawatts thermal (100% power).

Revised  
Amdt 2  
7-8-81

## (2) Technical Specifications

The Technical Specifications contained in Appendix A, as revised through Amendment No. 158, are hereby incorporated into this license. The licensee shall operate the facility in accordance with the Technical Specifications and the Environmental Protection Plan.

# McGuire Unit 2 Facility Operating License

- 3 -

EPP, Supplement 1

(6) Pursuant to the Act and 10 CFR Parts 30 and 40, to receive, possess and process for release or transfer such byproduct material as may be produced by the Duke Power Company Training and Technology Center.

C. This license shall be deemed to contain and is subject to the conditions specified in the Commission's regulations set forth in 10 CFR Chapter I and is subject to all applicable provisions of the Act and to the rules, regulations, and orders of the Commission now or hereafter in effect; and is subject to the additional conditions specified or incorporated below:

## (1) Maximum Power Level

The licensee is authorized to operate the facility at reactor core power levels not in excess of 3411 megawatts thermal (100% power) in accordance with the conditions specified herein and in Attachment 1 to this license. The preoperational tests, startup tests and other items identified in Attachment 1 to this license shall be completed as specified. Attachment 1 is hereby incorporated into this license.

Amdt.  
#2  
5-27-83

## (2) Technical Specifications

The Technical Specifications contained in Appendix A, as revised through Amendment No. 140, are hereby incorporated into this license. The licensee shall operate the facility in accordance with the Technical Specifications and the Environmental Protection Plan.

## (3) Antitrust Conditions

The licensee shall comply with the antitrust conditions delineated in Appendix C to this license;

## (4) Thermal Sleeves (Section 3.9.2 of SSER #6)\*

By December 31, 1983, the licensee shall provide, for NRC staff review and approval, justification for continued operation with the seven thermal sleeves removed from selected locations in the reactor coolant system;
