Reference: Docket No. 50-285

SUBJECT: Application for Amendment of Operating License

Enclosed please find Omaha Public Power District's (OPPD) "Application for Amendment of Operating License" which seeks to amend the Fort Calhoun Station Unit No. 1 Technical Specifications. The changes requested add a Limiting Condition for Operation and surveillance test for safety related inverters and deletes nonsafety related instrument buses. The proposed changes are based on the Combustion Engineering Standard Technical Specifications contained in NUREG-1432 and a similar request by the Calvert Cliffs Nuclear Power Plant.

Attachment A contains a markup reflecting the requested changes of the Technical Specifications. Attachment B provides the "Discussion, Justification and No Significant Hazards Consideration." OPPD requests 60 days from the date of issuance to implement these changes.

If you have additional questions, or require further information, please do not hesitate to contact me or members of my staff.

Sincerely,

W. G. Gates
