Re: Catawba Nuclear Station Unit 1  
Docket Nos. 50-413  
SD 413/84-01

Dear Mr. O'Reilly:

In my letter of April 20, 1984 transmitting an interim report on the subject deficiency, it was stated that additional vibration testing would be done after fuel loading and a supplementary report of the results would be issued by August 13, 1984. This date was contingent on the May schedule for fuel loading and heat-up.

Since fuel loading was delayed until the 19th of July, we have rescheduled the completion of this testing and will forward the supplementary report of our evaluation by November 1, 1984.

Very truly yours,

*H. B. Tucker*  
Hal B. Tucker
