Gentlemen:

VOGTLE ELECTRIC GENERATING PLANT
IMPLEMENTATION OF DELETION OF RESIDUAL
HEAT REMOVAL SYSTEM AUTOCLOSURE
INTERLOCK FOR UNIT 1

This is to confirm our telephone conversation of March 30, 1992, with Mr. D.S. Hood concerning the implementation of the license amendment related to the deletion of the residual heat removal system (RHRS) autoclosure interlock for Vogtle Electric Generating Plant Unit 1. Since your approval of the referenced amendment was contingent upon certain actions by Georgia Power Company (GPC), and these actions cannot be accomplished until the upcoming refueling outage in 1993, the amendment is not yet applicable to Unit 1. Therefore, GPC will implement this amendment (for Unit 2) in the Technical Specifications (TS) with an additional page, printed on colored paper, which will retain the requirements that existed prior to approval of the amendment for Unit 1. Upon implementation of the required actions by GPC on Unit 1, this additional page will be removed from the TS, and the Unit 1 requirements will be identical to those for Unit 2, reflecting the deletion of the RHRS autoclosure interlock.

Sincerely,

C.K. McCoy

CKM/NJS
