Docket No. 50-293
License No. DPR-35

Subject: Transmittal of Revised Procedure for Primary
Containment Venting

Enclosed is the revised portion of the PNPS procedure for venting of Primary Containment. The procedure is being transmitted as requested by Mr. A. Mohseni during a telephone conversation on March 12, 1992.

This procedure is used to implement the requirements of Emergency Operating procedures. A caution statement has been added to assure that operators review the emergency classification and understand that the declaration of a General Emergency will be made prior to using the direct torus vent.

If you have any questions, please feel free to call me or Dave Landahl at 508-747-9454.

R.A. Anderson
