Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Docket Nos.: 50-352
50-353

SUBJECT: Limerick Generating Station
Additional Information for Chemical Engineering Branch

Reference: 1) Letter from J. W. Gallagher to
A. Schwencer dated June 21, 1984
2) Telecon between PECO and NRC staff
on August 1, 1984 on Fire Protection
Deferral Item 2a

File: GOVT 1-1 (NRC)

Dear Mr. Schwencer:

The Reference 1) letter documented agreements made on six Fire Protection Deferral items at a meeting between PECO and the NRC Staff on June 13, 1984.

The discussion purpose was to respond to the NRC Staff concern that deferral of the sprinkler system installation in Fire Areas 41 and 42, listed in Reference 2), Attachment A, Item 2A until the first refueling outage was not acceptable.

We have reviewed the schedule for the sprinkler design and installation in conjunction with possible temporary protective measures and have concluded that the best course of action is to expedite the installation of the permanent sprinkler systems.

It was agreed during the Reference 2) discussion that these systems would be tested and operable prior to exceeding 5% power operation.

1/0

The NRC Staff also confirmed that it was expected that any Technical Specification requirement for an inoperable sprinkler system would be in effect during the deferral period. In this case, a continuous fire watch is required.

Sincerely,

JW Gallagher
