EFW Reliability, Condensate Storage Tank

Gentlemen:

In our letter dated July 3, 1984, (1CANØ784Ø2), AP&L stated that we would provide a response to Recommendation GL-2, which involves inadvertent closure of the condensate storage tank isolation valve by July 30, 1984. However, due to the work involved in preparing for the upcoming ANO-1 outage, our response will be delayed until August 24, 1984.

Very truly yours,

John R. Marshall
