Subject: LaSalle County Station Units 1 and 2 Cycle 5  
Reload and Core Operating Limits Reports  
NRC Docket Nos. 50-373 and 50-374

- References: (a) P.L. Piet (CECo) letter to (USNRC), dated March 18, 1992; "LaSalle County Nuclear Power Station Unit 2 Cycle 5, NRC Docket No. 50-374"
- (b) W.D. Arndt (General Electric) letter to J.W. Gieseke (CECo), dated December 30, 1991; Equipment OOS in ICF Domain, Final Report and 10CFR50.59 Safety Evaluation, LaSalle County Station

Gentlemen:

The Reference (a) letter advised you of Commonwealth Edison's review of the Unit 2 Cycle 5 reload and transmitted the Core Operating Limits Report (COLR) for the upcoming cycle. The reload review was performed under the provisions of 10 CFR50.59, and was transmitted to you for your information.

Figure 2.2-1 of the Unit 2 Cycle 5 report, Power Distribution Limits, is inaccurate. The Unit 1 Cycle 5 curve was inadvertently included in this report. A correct Figure 2.2-1 for Unit 2 is enclosed.

Additionally, Reference (b) supported operation with the End of Cycle (EOC) Recirculation Pump Trip (RPT) and Turbine Bypass Systems Out-of-Service (OOS) in the Increased Core Flow (ICF) domain with Final Feedwater Temperature Reduction for both Units 1 and 2. A copy of this report is attached. This analysis resulted in a revised Power Distribution Limits curve for the Unit 1 Cycle 5 Core Operating Limits Report (COLR). The revised COLR report is also included as an attachment to this letter. This revision to the Unit 1 Cycle 5 COLR report was performed under the provisions of 10CFR50.59, and is provided for your information.
