Gentlemen:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Technical Specification Change Request No. 231

Pursuant to 10 CFR 50.90, GPU Nuclear Corporation, operator of the Oyster Creek Nuclear Generating Station (OCNGS), Facility Operating License No. DPR-16, requests a change to that license.

The proposed revision of the submittal date for the Annual Exposure Data Report brings Oyster Creek into conformance with 10 CFR 20.2206 and relaxes an overly restrictive administrative requirement.

This change request has been reviewed in accordance with Section 6.5 of the OCNGS Technical Specifications, and using the standards in 10 CFR 50.92 we have concluded that this proposed change does not constitute a significant hazards consideration.

ADD 1

Pursuant to 10 CFR 50.91(b)(1), a copy of this change request has been sent to the State of New Jersey Department of Environmental Protection.

Very truly yours,

A handwritten signature in dark ink, appearing to read "John J. Barton". The signature is fluid and cursive, with the first name "John" being more prominent.

OYSTER CREEK NUCLEAR GENERATING STATION
OPERATING LICENSE NO. DPR-16
DOCKET NO. 50-219
TECHNICAL SPECIFICATION CHANGE REQUEST NO. 231

Applicant hereby requests the Commission to change Facility Operating License No. DPR-16 as discussed below, and pursuant to 10 CFR 50.91, an analysis concerning the determination of no significant hazards consideration is also presented:

1.0 SECTION TO BE CHANGED

6.9 Reporting Requirements

2.0 EXTENT OF CHANGE

This proposed Technical Specification Change Request reflects the requirements of 10 CFR 2206 (c) which requires the licensee to submit the Annual Exposure Data Report covering the previous year, on or before April 30 of each year.

3.0 CHANGES REQUESTED

As delineated on the attached revised Technical Specification page: 6-13.

4.0 DISCUSSION

The proposed revision of the submittal date for the Annual Exposure Data Report brings Oyster Creek into conformance with 10 CFR 20.2206 and relaxes an overly restrictive administrative requirement. This change has no effect on facility operations and clearly is in keeping with the regulation.

5.0 DETERMINATION

GPU Nuclear has determined that operation of the Oyster Creek Nuclear Generating Station in accordance with the proposed Technical Specification does not involve a significant hazard. The changes do not:

1. Involve a significant increase in the probability or the consequence of an accident previously evaluated.

This change is administrative in nature and has no effect on the operation of the plant. This change will not increase the probability or consequence of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any previously evaluated.

Operation of the facility in accordance with this proposed change will not create the possibility for an accident or malfunction of a different type from any accident previously evaluated. The proposed amendment does not modify any system (component) operation or maintenance activity. The facility will continue to be operated within the limits of existing accident analysis and margins of safety.

3. Involve a significant reduction in a margin of safety.

This change brings the submittal date for the Annual Exposure Data Report into conformance with 10 CFR 20.2206 and relaxes an overly restrictive administrative requirement. Since the proposed change does not alter any system hardware or design basis, the margin of safety is not reduced.

6.0 IMPLEMENTATION

We request that the amendment authorizing this change become effective upon issuance.
