Dear Judge Smith -

I am very concerned about the licensing of the Byron nuclear plant.

My concern is primarily about the safety - I would really urge NRC review carefully all outstanding points of contention about safety, making sure there is inspection evidence not merely testimony concerning safety. Especially urged hearing testimony from any workers that are brave enough to testify.

D503

My second concern is the
financial aspect. I really
RESENT having to "put up
"tax" for the lost revenues.
I don't feel it's necessary -
energy conservation figures
indicate that - and if
there is financial risk
to be taken, it should be
borne by stockholder, not
consumer.

Thank you

Judith Emmett
