Office of Nuclear Reactor Regulation  
Attn: J. Stolz, Chief  
Operating Reactors Branch No. 4  
Division of Operating Reactors  
U.S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Sir:

Three Mile Island Nuclear Station Unit 1 (TMI-1)  
Operating License No DPR-16  
Docket No. 50-289  
Environmental Qualification of Electrical Equipment

To supplement our letter of June 28, 1984, GPUN is continuing its review of environmental qualification to ensure completeness. However, some of our resources have been diverted to support the NRC Audit on the EFW System and the audit of SBLOCA and radiation files and for this reason, our response to your letter of May 25, 1984 is running behind schedule. We intend to provide our response in October, 1984.

Sincerely,

  
H. D. Hukill  
Director, TMI-1
