OFFICE OF SECRETARY  
DOCKETING & SERVICE  
BRANCH

Dear Sir,  
I have written you a recent letter regarding my concerns about the Limerick Nuclear Station. As I explained in my letter, an in-depth article by the Phila. Inquirer, dated June 24, 1984, citing the malpractices of various utilities, caused me to have renewed concern for the integrity of state-run utilities.  
I again reiterate, the nuclear industry is such a highly technical, volatile one, my heart will only rest 'til it is nationalized.

However, the above is somewhat repetitive. This letter relates to the audacity of Pennsylvania officials to accept, without equivocation, Phila. Electric setting up its own drill date. Also, that PEMA would consider giving the "exercise" any mark considering that critical parts of the population were not involved (school kids).

The final straw was reading the Montgomery County Plan and finding that it designated Methacton School District within the EPZ. It also designated Methacton as a host school even though it is in the EPZ. I have also heard that the air-intake systems of schools are such that they would not protect students in the case of radiation.

The bottom line is that I am really upset, that such inconsistencies exist and yet the utility and FEMA suggest that the evacuation plan is well in hand.

Your response would be greatly appreciated.

Sincerely,  
Mrs. Elaine B Graham
