Subject: Docket 50-482: Corrections to the 1992, 1993 and 1994
Annual Radiological Environmental Operating Reports

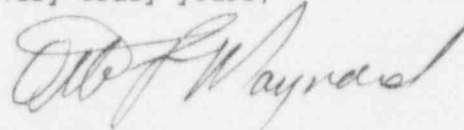

Gentlemen:

During an evaluation of the Wolf Creek Radiological Environmental Monitoring Program 1995 Land Use Census results, it was discovered that the calculation used to determine the deposition rate for area gardens was inaccurate. Since the purpose of these calculations was to identify the most conservative sample sites, it is important to note that despite the errors made, the most conservative sites were still chosen.

In order to correct this error, revised pages for the 1992, 1993 and 1994 Annual Radiological Environmental Operating Reports are enclosed. Annual Radiological Environmental Operating Reports issued by Wolf Creek prior to 1992 did not contain this data and do not require revision.

If you have any questions concerning this matter, please contact Mr. Brad Loveless at extension 4530.

Very truly yours,

Otto L. Maynard
