SUBJECT: Semi-Annual Radioactive Effluent
Release Report Errata

REFERENCE: 1) P-84312, J. W. Gahm to
E. H. Johnson, August 27, 1984

Dear Mr. Johnson:

In reviewing Reference 1, an error has been noted in the data contained in the Summary Section, to wit:

The tritium release via the liquid pathway for the first half of 1984 was approximately 37 curies, not 6.5 as reported. The Xenon 133 release via the gaseous pathway for the first half of 1984 was approximately 96 curies, not 19 as reported. The table values as contained in the report are correct.

We regret any inconvenience this may have caused.

Sincerely,

J. W. Gahm
