

Federal Emergency Management Agency

Washington, D.C. 20472

SEP 14 1984

MEMORANDUM FOR: Edward L. Jordan
Director, Division of Emergency
Preparedness and Engineering
Response
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission

FROM: *Richard W. Krimm*
Richard W. Krimm
Assistant Associate Director
Office of Natural and Technological
Hazards Programs

SUBJECT: Exercise Report of the April 11, 1984, Exercise of the
Offsite Radiological Emergency Preparedness Plans for
the Grand Gulf Nuclear Station

Attached are two copies of the Exercise Report of the April 11, 1984, joint exercise of the offsite radiological emergency preparedness plans for the Grand Gulf Nuclear Station. The State of Louisiana was granted an exemption from participation due to their full-scale testing of State capabilities in the Waterford III exercise conducted on February 8, 1984. The State of Louisiana voluntarily participated on a limited scale at Grand Gulf to support Tensas Parish. This was a full-participation exercise for Tensas Parish. The report dated August 16, 1984, was prepared by Region VI staff of the Federal Emergency Management Agency (FEMA).

There were two Category B deficiencies observed at the exercise. These deficiencies did not detract from the overall capability demonstrated by the State of Louisiana and Tensas Parish to protect the health and safety of the public in the vicinity of the Grand Gulf Nuclear Station. Therefore, the 44 CFR 350 approval granted on June 29, 1983, will remain in effect. FEMA Region VI staff will furnish a copy of this report to the State of Louisiana and will request a schedule of corrective actions. As soon as we receive and analyze the State's response, we will provide you with the results.

If you have any questions, please contact Mr. Robert S. Wilkerson at 287-0200.
