Re: Nine Mile Point Unit 2  
Docket No. 50-410

Dear Mr. Starostecki:

The final report in accordance with 10CFR50.55(e) concerning items supplied by Tube-Line Corporation will be submitted to the Nuclear Regulatory Commission by October 1, 1984, rather than August 15, 1984. During the verification process, it was determined that the results of the initial investigation of Category I installations were inconclusive; therefore, additional investigations were initiated. This information was communicated to your staff and the extension granted, via a telephone conversation between Mr. G. Griffith (Nine Mile Point Unit #2, Licensing) and Mr. P. Russ of your staff on August 8, 1984.

Very truly yours,

C. V. Mangan  
Vice President  
Nuclear Engineering & Licensing
