NARRATIVE SUMMARY

Month: October 1984

The unit is in a refueling outage.

MONTHLY REFUELING INFORMATION REQUEST

1. Facility name: Oconee Unit 1
2. Scheduled next refueling shutdown: Currently Refueling
3. Scheduled restart following refueling: _____
4. Will refueling or resumption of operation thereafter require a technical specification change or other license amendment? Yes
If yes, what will these be? Technical Specification Revision

If no, has reload design and core configuration been reviewed by Safety Review Committee regarding unreviewed safety questions? N/A

5. Scheduled date(s) for submitting proposed licensing action and supporting information: N/A
6. Important licensing considerations (new or different design or supplier, unreviewed design or performance analysis methods, significant changes in design or new operating procedures). _____

7. Number of fuel assemblies (a) in the core: 177
(b) in the spent fuel pool: 1096*
8. Present licensed fuel pool capacity: 1312
Size of requested or planned increase: _____
9. Projected date of last refueling which can be accommodated by present licensed capacity: August 1991

DOCKET NO: 50-270
UNIT: Oconee 2
DATE: 11/15/84

NARRATIVE SUMMARY

Month: October 1984

The unit reduced power on 10/06 and 10/12 to perform PT's. On 10/13 and 10/23, the unit drained Air Ejector lines that were filled with water to improve condenser efficiency. The unit was forced to reduce power to 25% because of a leaking Moisture Separator Reheater drain line. The drop in output caused the drop in pressure on the line needed to effect repairs.

MONTHLY REFUELING INFORMATION REQUEST

1. Facility name: Oconee Unit 2.
2. Scheduled next refueling shutdown: February, 1985.
3. Scheduled restart following refueling: April, 1985.
4. Will refueling or resumption of operation thereafter require a technical specification change or other license amendment? Yes.
If yes, what will these be? Technical Specification Revision

If no, has reload design and core configuration been reviewed by Safety Review Committee regarding unreviewed safety questions? N/A.

5. Scheduled date(s) for submitting proposed licensing action and supporting information: N/A.
6. Important licensing considerations (new or different design or supplier, unreviewed design or performance analysis methods, significant changes in design or new operating procedures).

7. Number of fuel assemblies (a) in the core: 177.
(b) in the spent fuel pool: 1096*.
8. Present licensed fuel pool capacity: 1312.
Size of requested or planned increase: _____.
9. Projected date of last refueling which can be accommodated by present
licensed capacity: August, 1991.

OCONEE NUCLEAR STATION

Monthly Operating Status Report

1. Personnel Exposure

For the month of September, no individuals exceeded 10 percent of their allowable annual radiation dose limit.

2. The total station liquid release for September has been compared with the Technical Specifications maximum annual dose commitment and was less than 10 percent of this limit.

The total station gaseous release for September has been compared with the Technical Specifications maximum annual dose commitment and was less than 10 percent of this limit.
