U.S. Nuclear Regulatory Commission  
Mr. Eric H. Johnson  
Reactor Project Branch Chief  
611 Ryan Plaza Drive, Suite 1000  
Arlington, Texas 76011

SUBJECT: INITIAL 10CFR50.72  
NOTIFICATION TO NRC

REFERENCE: G-84350 (Johnson to  
Lee, Dated 09/11/84)

Dear Mr. Johnson:

In reference to the above inspection report, an item has been discovered which requires further clarification. On page 8, the last sentences of the next-to-last paragraph read:

"The licensee pointed out problems that occur when trying to report FSV events to headquarters' duty officers who are sometimes not completely familiar with HTGR technology. The licensee also stated that the reporting requirements addressed in 10CFR50.72 did not clearly identify that the CRD failure was reportable. As a followup to this issue, the SRI determined that the Superintendent of Operations or his alternate has been designated as the individual required to make the initial report instead of the Shift Supervisor."

Whereas the Superintendent of Operations has agreed to make the initial notification during normal working hours, the on-duty Shift Supervisor shall remain responsible for initial notification when neither the Superintendent of Operations or his alternate are immediately available to do so within the time limits of 10CFR50.72.
