Dear Sir:

NRC Generic Letter (GL) 89-10 "Safety Related Motor-Operated Valve Testing and  
Surveillance - 10CFR 50.54 (f)," item m, requires licensees to notify the NRC in writing  
within 30 days after the actions described in the first paragraph of item i of the GL  
have been completed. The purpose of this letter is to provide the NRC with  
notification that these actions were completed on December 29, 1995, for Peach  
Bottom Atomic Power Station (PBAPS) Unit 3 valves in accordance with PECO Energy

Company's (PECO Energy) commitments as documented in the referenced letters. A GL 89-10 program completion report is being prepared and will be available for review.

In response to GL 89-10, PECO Energy developed and implemented a program to verify the design basis capability of motor operated valves (MOVs) within the scope of the GL program. The GL 89-10 program MOVs at PBAPS Unit 3 have been tested and setup with the best available data.

PECO Energy has made a significant commitment of resources toward implementing the GL 89-10 program at PBAPS. Completion of the program involved more than a five year effort. Future program changes deemed necessary in response to emerging issues and newly available data will be handled under the provisions of 10CFR50.59.

If you have any questions or require additional information, please do not hesitate to contact us.

Sincerely,

G. A. Hunger, Jr.  
Director - Licensing
