Director, Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Mr. S. A. Varga

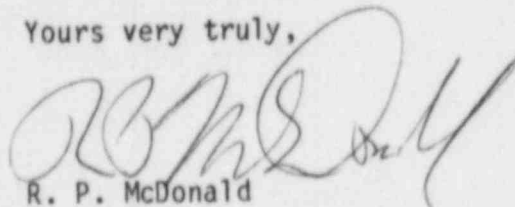

Joseph M. Farley Nuclear Plant - Units 1 and 2
Containment Vent and Purge Operation

Gentlemen:

By letter dated January 31, 1985 the NRC requested Technical Specification proposals and a schedule for a study to reduce containment building purging. Due to the extended Unit 2 outage associated with tendon surveillance and replacement and the preparation for the Unit 1 refueling outage scheduled to commence April 5, 1985, the evaluation of this NRC request has been delayed. Alabama Power Company will complete its evaluation and respond to the NRC by April 19, 1985.

If there are any questions, please advise.

Yours very truly,

R. P. McDonald
