MEMORANDUM FOR: Edward L. Jordan, Director
Division of Emergency Preparedness
and Engineering Response
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission

FROM: *Richard W. Krimm*
Richard W. Krimm
Assistant Associate Director
Office of Natural and Technological
Hazards Programs

SUBJECT: Supplemental Interim Finding on Commanche Peak Steam Electric
Station Offsite Radiological Emergency Plans and Preparedness

Attached is a supplemental evaluation of the State of Texas and Hood and Somervell Counties offsite radiological emergency preparedness plans site-specific to the Commanche Peak Steam Electric Station. This finding was prepared by Region VI of the Federal Emergency Management Agency (FEMA).

The review of the plans was based on Section II (A through P), Planning Standards and Evaluation Criteria, NUREG-0654/FEMA REP-1, Rev. 1. Based on this current review, our earlier interim finding submitted to the Nuclear Regulatory Commission on September 29, 1982, and the results of the exercise on December 14, 1983, offsite radiological emergency plans and preparedness for the Comanche Peak Steam Electric Station have been determined to be adequate. Consequently, there is reasonable assurance that appropriate measures can be taken offsite to protect the health and safety of the public living in the vicinity of the Commanche Peak Steam Electric Station.

If you have any questions, please contact Robert S. Wilkerson, Chief, Technological Hazards Division, at 287-0202.
