Dear Mr. Hunter:

On September 18, 1984 we verbally notified your Mr. D. Hunnicutt of a deficiency regarding the safety class of instrument lines with piping downstream of the root valve. We have submitted an interim report logged TXX-4336 dated October 12, 1984.

We have completed our investigation and concluded that the matter is not reportable under 10CFR50.55(e). Records supporting this determination are available for your inspector's review at the CPSES site.

Very truly yours,

Billy R. Clement
