Dear Mr. Schwencer:

License Condition 8(a)3 Detailed Control Room Design Review: Control Room Enhancements requires that certain control room enhancements be completed prior to exceeding five percent (5%) of rated power. This letter is to advise you that these control room enhancements have been completed, and that this part of License Condition 8(a) has been satisfied. As stated in Attachment 4 to the reference letter, these enhancements are related to the control room panels (paint, tape and label), re-scaling of instruments using acceptable human factors methods, and changes to standard control switch shapes.

The other two items required by License Condition 8(a), the Task Analysis and Control Room Inventory [8(a)1], and the Control Room Survey [8(a)2], are scheduled for completion by June 30, 1985 and March 27, 1985 respectively.

Sincerely,
