Dear Sir:

The NRC was notified of a potentially reportable deficiency in
Reference (A), Interim Reports were transmitted by References (B) and
(D), and Time Extensions were requested by References (C) and (F).
Reference (F) estimated that a Final Report would be available by
November 21, 1984.

The overall results of the PVNGS review of this matter and associated
testing programs were presented to the NRC on November 13, 1984.
However, due to the extensive Materials testing performed, final review
of test data is taking longer than originally expected. It is now
expected that this information will be finalized by December 3, 1984.

Very truly yours,

E. E. Van Brunt, Jr.
