Mr. John Zwolinski, Chief
Operating Reactors Branch No. 5
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Zwolinski:

Subject: GPU Nuclear Corporation (GPUN)
Oyster Creek Nuclear Generating Station
Docket No. 50-219
Environmental Qualification of Equipment Important to Safety

This letter is to reiterate and clarify previous submittals to the Staff, as well as discussion with the Staff on March 26, 1985, regarding the Oyster Creek Environmental Qualification scheduler extension request for certain electrical components. Our recent letters dated February 22, 1985, March 15, 1985, and March 27, 1985, do not constitute scheduler extension requests beyond November 30, 1985. GPUN will notify the Commission of any significant equipment qualification scheduler problems that may require completion dates beyond November 30, 1985 as soon as such complete facts are in our possession. At that time, we would seek scheduler relief from the Commission or would not operate the plant beyond November 30, 1985, until qualification was complete or the scheduler exemption granted.

Very truly yours,

A. F. Wilson
Vice President
