Mr. William J. Dircks
Executive Director for Operations
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Dircks:

The Federal Emergency Management Agency (FEMA) has completed an analysis of the prompt alert and notification system for the Enrico Fermi Atomic Power Plant, Unit 2, in Frenchtown Township, Michigan. This review has been completed pursuant to FEMA rule 44 CFR 350; selected evaluative criteria and Appendix 3 in NUREG-0654/FEMA-REP-1, Rev. 1; and FEMA-43, the "Standard Guide for the Evaluation of Alert and Notification Systems for Nuclear Power Plants." The enclosed report entitled "Enrico Fermi Atomic Power Plant, Unit 2 Site-Specific Offsite Radiological Emergency Preparedness Alert and Notification System Independent Technical Review," summarizes the engineering design review, incorporates the results of the telephone survey of the public conducted immediately following the alert and notification system activation on July 20, 1984, and includes the results of the review of the other applicable evaluative criteria from NUREG-0654/FEMA-REP-1, Rev. 1, and FEMA-43.

Based on the aforementioned review and the results of the alert and notification system activation, FEMA has determined that the prompt alert and notification system installed around the Enrico Fermi Atomic Power Plant, Unit 2, meets the specific design requirements of NUREG-0654/FEMA-REP-1, Rev. 1, and FEMA-43, and that there is reasonable assurance that the system is adequate to promptly alert and notify the public in the event of an accident at the site. A complete review of the plans and preparedness for the Enrico Fermi Atomic Power Plant, Unit 2, under FEMA rule 44 CFR 350, will be completed at a later date.

Sincerely,

Samuel W. Speck
Associate Director
State and Local Programs
and Support
