EMERGENCY PLAN IMPLEMENTING PROCEDURE*Gray*
2-25-85EP-102 UNUSUAL EVENT RESPONSE1.0 PARTICIPANTS

- 1.1 Shift Superintendent or designated alternate shall assume the role of Emergency Director and implement this procedure, until relieved.
- 1.2 Station Superintendent or designated alternate shall relieve the Emergency Director, assume the role of Emergency Director, and continue implementing this procedure, if necessary.

2.0 ACTIONS-IMMEDIATE

- 2.1 Emergency Director shall:
 - 2.1.1 Verify the emergency classification as determined in EP-101, Classification of Emergencies unless determination has just been made.
 - 2.1.2 Complete Appendix EP-102-1, Unusual Event Notification Message. Direct a communicator to complete notification of the appropriate parties in Appendix EP-102-3, Unusual Event Phone List within 15 minutes.
 - 2.1.3 Direct the evacuation of affected areas, if necessary. Refer to the following procedure:
EP-303 Local Evacuation
 - 2.1.4 Contact the Station Superintendent, if necessary, and the Shift Technical Advisor, inform them of the situation.
 - 2.1.5 For samples, contact the Shift Chemistry Technician. If necessary, implement EP-230, Chemistry Sampling and Analysis Team.
 - 2.1.6 For in-plant surveys, or contaminated injury, contact a Shift HP Technician. If necessary, implement EP-250, Personnel Safety Team.

CONTROLLED COPY
VALID ONLY WHEN RED
PROPRIETARY

- 2.1.7 For fire/damage repair, contact the Maintenance Shift Assistance Foreman. If necessary, to implement EP-260, Fire and Damage Team and/or EP-261, Damage Repair Group.
- 2.1.8 For a liquid release, implement EP-312, Radioactive Liquid Release, if required.
- 2.1.9 For security matters, implement EP-208, Security Team, if required.
- 2.1.10 For airborne releases, contact Shift Technical Advisor. If necessary, implement EP-210, Dose Assessment Team.

3.0 ACTIONS-FOLLOW-UP

- 3.1 Emergency Director shall:
 - 3.1.1 Periodically reevaluate the event classification in accordance with EP-101. Classification of Emergencies, and escalate or de-escalate the classification, as necessary.
 - 3.1.2 If classification is de-escalated fill out Appendix EP-102-2, Unusual Event De-Escalation Message and give it to the communicator and direct the communicator to perform notification of the appropriate parties listed in Appendix EP-102-3, Unusual Event Phone List.
 - 3.1.3 Obtain the following information as necessary to formulate further actions:
 - A. Sample analysis from Shift Chemistry Technician or Chemistry Sampling and Analysis Team Leader.
 - B. In-plant surveys or status of contaminated injury from Shift HP Technician or Personnel Safety Team Leader.
 - C. Fire/Damage Repair status from the Maintenance Shift Assistant Foreman or Fire and Damage Team Leader.
 - D. Airborne releases calculation results from Shift Technical Advisor or Dose Assessment Team Leader.
 - E. Notification Results from Communicator.

- 3.1.4 Determine which support personnel are necessary for emergency functions and direct the Shift Clerk to contact those personnel. If Shift Clerk is not available, this function shall be assigned to an available individual.

- 3.2 Communicator shall:

- 3.2.1 Inform Emergency Director when appropriate notifications have been made and submit completed copy of Appendix EP-102-3, Unusual Event Phone List, for Emergency Director's Signature.

- 4.0 APPENDICES

- 4.1 EP-102-1 Unusual Event Notification Message
- 4.2 EP-102-2 Unusual Event De-Escalation Message
- 4.3 EP-102-3 Unusual Event Phone List

- 5.0 SUPPORTING INFORMATION

- 5.1 Purpose

The purpose of this procedure is to provide guidelines for site response to an Unusual Event.

- 5.2 Criteria for Use

- 5.2.1 This procedure shall be implemented when an event has been classified as an Unusual Event per EP-101, Classification of Emergencies, and EP-101 has been completed.

- 5.3 Special Equipment

None

APPENDIX EP-102-1

UNUSUAL EVENT NOTIFICATION MESSAGE

MESSAGE: This (is)(is not) a drill. This (is)(is not) a
drill. This is the Limerick Generating Station calling to report an
Unusual Event. My name is _____, telephone
_____. Limerick Generating Station is reporting an
Unusual Event declared at Unit No. _____. Time and date of
Unusual Event classification are
_____, _____.
(24 Hr Clock Time) (Date)
The basic problem is _____.
There (has been) (has not been) an (airborne) (liquid)
radioactive release from the plant. The plant status is (stable)
(improving) (degrading) (not known). There is no protective action
recommended. This (is) (is not) a drill. This (is) (is not) a
drill.

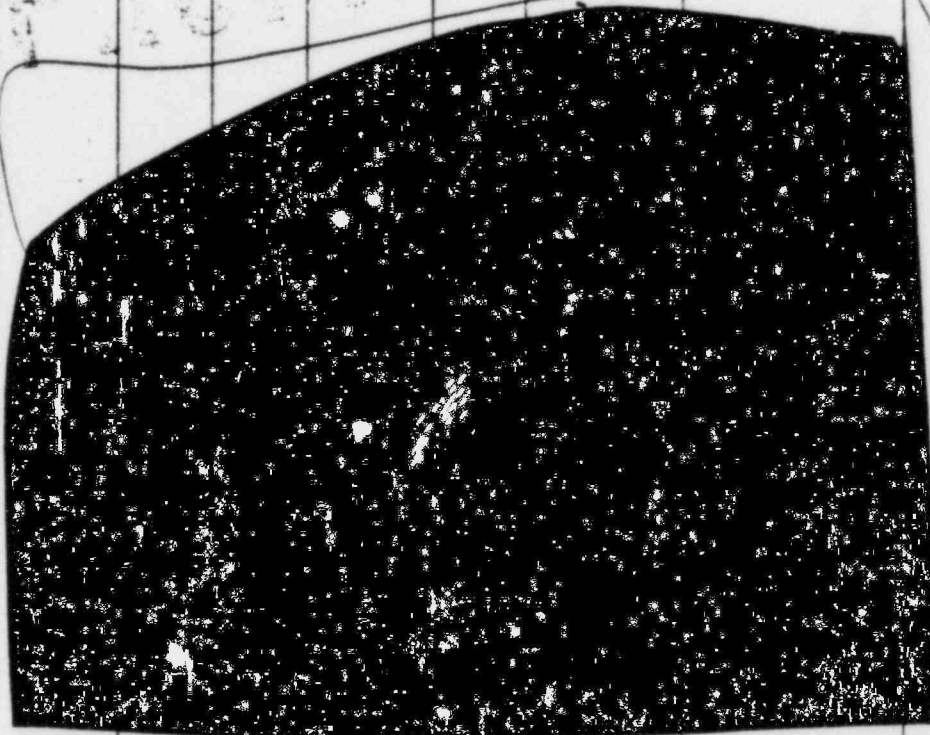

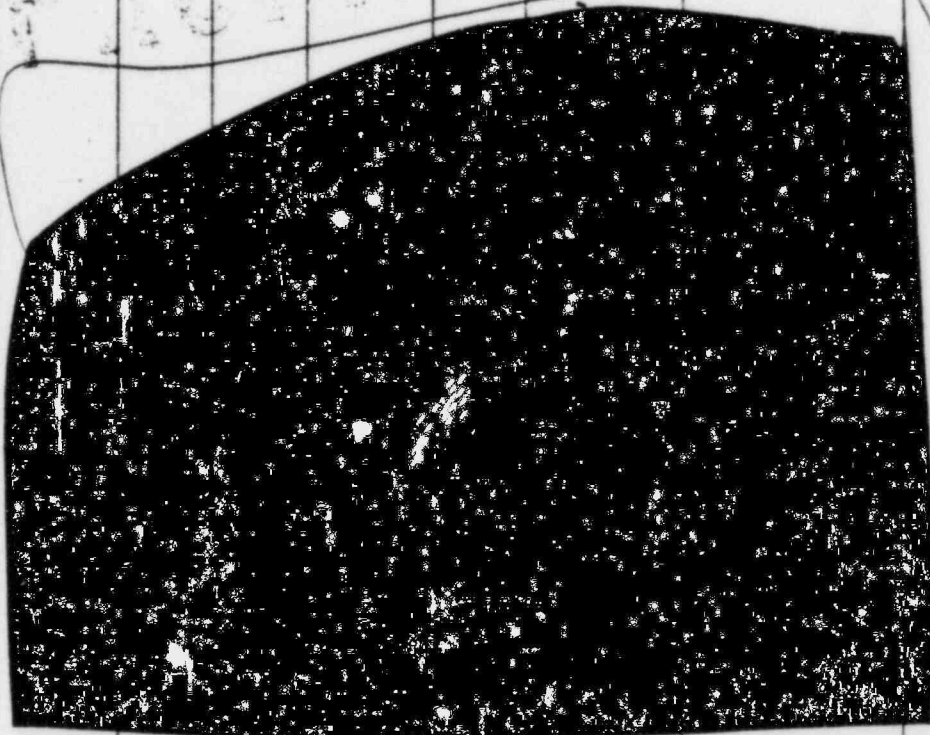

APPENDIX EP-102-2

UNUSUAL-EVENT DE-ESCALATION MESSAGE

MESSAGE: This (is) (is not) a drill. This (is) (is not) a
drill. This is Limerick Generating Station calling to de-escalate
an Unusual Event. Please connect me with the appropriate authority.
This is Limerick Generating Station calling to report the
termination of an Unusual Event. My name is _____.
Time and date are _____. This (is) (is not) a drill.
This (is) (is not) a drill.

Gray
2/10/85PHILADELPHIA ELECTRIC COMPANY
LIMERICK GENERATING STATION
EMERGENCY PLAN IMPLEMENTING PROCEDUREEP-211 FIELD SURVEY GROUP1.0 PARTICIPANTS

- 1.1 Field Survey Group Leader shall direct the actions of the Field Survey Group members.
- 1.2 Field Survey Group Members shall conduct field surveys and onsite (out-of-plant) surveys.

2.0 ACTIONS - IMMEDIATE

- 2.1 Field Survey Group Leader (FSGL) shall:
 - 2.1.1 Report to the Technical Support Center (TSC).
 - 2.1.2 Discuss the situation with the Dose Assessment Team Leader. This discussion should include: the potential for release, the magnitude of the radioactive source term, meteorological conditions and potential for change, and the number of field survey squads needed.
 - 2.1.3 Coordinate the formation of the required number of field survey squads. Personnel supplied by the Operations Support Center (OSC) consists of a Health Physics Technician and a driver.
 - 2.1.4 Obtain drivers and vehicles from the Fire and Damage Team Leader and have them report to the TSC.
 - 2.1.5 Direct field survey squads to obtain emergency dosimetry.
 - 2.1.6 Instruct the H.P. Technicians to secure and inventory the required number of field survey kits and radios, and perform equipment checks. The radios are located in the Dose Assessment Room in the Technical Support Center and the field survey kits are located in the storage closets in the Personnel Entry Area of the Technical Support Center.

CONTROLLED COPY
VALID ONLY WHEN RED
PROPRIETARY

- 2.1.7 Discuss the situation with each squad, assign each squad a unique color designation, and direct them to specific initial locations.

IF THE FIRST SURVEY POINT IS AN ONSITE LOCATION, INFORM THE SQUAD(S) MEMBERS OF ADDITIONAL PRECAUTIONS ASSOCIATED WITH THE POTENTIALLY ELEVATED RADIATION LEVELS.

METEOROLOGICAL CONDITIONS, EXPECTED RADIATION LEVELS, AND OTHER HAZARDS SHALL BE USED TO DETERMINE THE POSITIONING OF FIELD SURVEY GROUPS.

- 2.1.8 Notify Security Team Leader of the names of field survey squad members so that they will not be detained upon leaving the site.

2.2 Field Survey Squad Members shall:

- 2.2.1 Report to the Field Survey Group Leader (FSGL) at the Technical Support Center or the Personnel Safety Team Leader after the EOF has been activated.

- 2.2.2 Obtain a field survey kit and a radio.

- 2.2.3 Break the seal on the field survey kit and check equipment for operability including source check of survey equipment. Document equipment checks on EP-211-2.

IF THE SEAL ON THE FIELD SURVEY KIT WAS ALREADY BROKEN, PERFORM AN INVENTORY OF THE KIT CONTENTS.

- 2.2.4 Obtain emergency dosimetry (0-1500 mR and 0-5 R Direct Reading Dosimeters (DRDs). Ensure that DRDs are zeroed prior to leaving the TSC.

- 2.2.5 Obtain information from the FSGL on the situation, plan of action, specific survey locations, and necessary precautions.

ISSUANCE OF A 0-5 R DRD IS NOT TO BE INTERPRETED AS AN AUTHORIZATION TO EXCEED STATION ADMINISTRATIVE GUIDELINES.

- 2.2.6 Upon leaving the TSC keep all dosimetry.

- 2.2.7 Ensure that the E-520/HP-270 or equivalent is on and operating prior to leaving the TSC.

- 2.2.8 Perform communication check of radios with the FSGL at the survey vehicle.

- 2.2.9 Proceed to the first survey point as directed by the FSGL.

3.0 ACTIONS - FOLLOW-UP

3.1 Field Survey Group leader shall:

- 3.1.1 Maintain communication with and direct the activities of the field survey squads. Ensure that the location of each squad on the Field Survey display map is updated as necessary.
- 3.1.2 Obtain field survey results as provided by field survey squads and record results on EP-211-5, Field Survey Group Leader Data Record.
- 3.1.3 Provide the field survey squads with status updates including: radiological and meteorological conditions, etc.
- 3.1.4 Dispatch the field survey squads to additional survey locations as necessary.
- 3.1.5 Field Survey Group Exposure Record, Appendix EP-211-3, shall be completed as directed by the Field Survey Group Leader.
- 3.1.6 If the field survey squad members and/or vehicles become contaminated inform the Personnel Safety Team Leader.
- 3.1.7 When advised that the EOF has taken over the Dose Assessment function, inform the field survey squads. Perform a formal turnover with the EOF Field Survey Group Leader and report to the Dose Assessment Team Leader.

3.2 Field Survey Squad Members shall:

If an onsite (out-of-plant) survey is required, take an air sample using a Lapel Air Sampler in accordance with the appropriate steps of HP-428, Operation of the Gilian Model HFS 113AUT Lapel Air Sampler, transport the air sampler assembly to the counting room on Elevation 217 of the Radwaste Enclosure to be analyzed, and proceed with the remainder of this procedure.

- 3.2.1 While in transit, ensure that the E-520/HP-270 or equivalent is on and switched to the lowest appropriate scale. Hold the probe outside the vehicle and have the driver proceed until the

specified survey location is reached. Continuously monitor the survey instrument while in transit.

- 3.2.2 When survey location is reached, pull off the road and turn on emergency flashers. Exit vehicle and determine the maximum dose rate at waist height in a 360 degree radius using the E-520/HP-270 or equivalent. Take readings with the probe shielded and unshielded. If the unshielded reading is greater than two times the shielded reading, assume that you are immersed in the plume (as opposed to seeing the effects of skyshine).
- 3.2.3 Record all results on EP-211-2, Field Survey Group Survey Record, and transmit information to the FSGL by radio. If the radio does not function properly, locate a telephone and report survey information. Call (TSC) or (EOF) and ask for the Field Survey Group Leader.
- 3.2.4 Take air sample at the "field" survey locations if directed by the FSGL as follows:

CAUTION

ENSURE THAT THE ON/OFF SWITCH IS OFF PRIOR TO CONNECTING THE AIR SAMPLER TO THE VEHICLE BATTERY. CONNECT RED LEAD TO THE POSITIVE BATTERY TERMINAL AND BLACK LEAD TO NEGATIVE BATTERY TERMINAL.

- 3.2.4.1 Connect terminals of Radeco H809C or equivalent to vehicle battery with engine running as stated above. Place air sampler on an elevated surface, not the ground.
- 3.2.4.2 Mark filter and silver zeolite cartridge to indicate air flow direction.
- 3.2.4.3 Orient the air sampler toward the plant and run air sampler for 5 minutes or as directed by FSGL. Record the indicated flow rate on EP-211-4, Field Survey Air Sample Data Record.
- 3.2.4.4 While air sampler is running, label one envelope and one small plastic bag with the following information: Location, Date, Flow rate, Time On, and Time Off.

AIR SAMPLER SHOULD NOT BE RUN AT GREATER THAN 2.5 cfm. ADVISE FSGL IF SUCH IS THE CASE.

CONFIDENTIAL

- 3.2.5 If so directed by the FSGL take 6 inch and waist level shielded probe measurements using the E-520/HP-270. If the 6 inch reading is greater than the waist level reading, take several disc smears of representative flat environmental surfaces. Using caution to prevent the spread of contamination, place smears in labelled envelopes for counting at a later time.
- 3.2.6 When you have finished collecting the Air Sample, inform the FSGL that the air sample is ready to be analyzed. Disconnect air sampler, place air sampler in vehicle, and drive to a low background counting area, as directed by the FSGL. While in transit, monitor E-520/HP-270 or equivalent for radiation levels. Note minimum and maximum readings and transmit the location of these readings to the FSGL.
- 3.2.7 Upon arrival at the low background counting area, set up the SAM-2 or equivalent and allow to warm up and stabilize, as follows:
- 3.2.7.1 Connect cable from RD22 probe to "Detector" jack on the front of the SAM-2.
- 3.2.7.2 Connect the battery lead to the "Battery" jack on the back of the SAM-2. Plug other end of lead into the socket on the side of the battery pack.
- 3.2.7.3 Set the SAM-2 Controls as follows:
- Stabilizer: OFF
- Count Mode: TIMED
- Meter Channel: 1
- Window: Set as shown on
Calibration Sticker
- Threshold: Set as shown
on Calibration Sticker
- Multiplier: x10
- Response: "Midrange" - "IN"
- Count Time: 5 x 1
- Channel 1: In, +
- Channel 2: Off, out
- H.V.: As shown on the SAM-2 Calibration
Sticker.

- 3.2.7.4 Switch the "Power" Switch on the back of the SAM-2 to "ON". Press the "RESET START" button on the front of the SAM-2 and allow the instrument to count for 5 minutes to warm up.

IF THE "BATT OK" LIGHT IS NOT LIT, INFORM FSGL.

- 3.2.8 Remove only the particulate filter from the air sampler head and perform an analysis of the particulate filter using the E140N/HP-210T with the SH4A sample holder. Record background readings and sample readings in EP-211-4, Field Survey Air Sample Data Record.

CAUTION

IF BACKGROUND RADIATION LEVELS EXCEED 300 CPM USING THE E-140N/HP-210 T, INFORM THE FSGL AND MOVE TO ANOTHER COUNTING AREA WHERE THE BACKGROUND IS LESS THAN OR EQUAL TO 300 CPM.

- 3.2.9 Run the air sampler for one minute with the silver zeolite cartridge in place to purge the cartridge.
- 3.2.10 Place the Ba-133 check source cartridge against the end of the RD22 probe and set the count time on the SAM-2 to 2x1 minutes. Press the "RESET START" button and count. Record total number of counts on Appendix EP-211-4.
- 3.2.11 To establish the background of the counting system, exchange a clean silver zeolite cartridge for the Ba-133 check source and press "RESET START". Record total number of counts on Appendix EP-211-4.
- 3.2.12 Compute the net count rate as follows:
- $$\text{NET(CPM)} = \frac{\text{GROSS COUNTS} - \text{BKG COUNTS}}{2}$$
- and record on Appendix EP-211-4.
- 3.2.13 Compare the net count rate to the allowable net count rate listed on the SAM-2 calibration label. If the measured net count rate is within the range specified, proceed to 3.2.14 and use the SAM-2 for I-131 determination. IF THE NET COUNT RATE FALLS OUTSIDE OF THE ALLOWABLE RANGE, REPEAT STEPS 3.2.10 TO 3.2.13 ONE TIME. If results are still unsatisfactory, inform the Field Survey Group Leader.

THE BA-133 SOURCE CHECK STEPS 3.2.10 to 3.2.13, MUST BE PERFORMED INITIALLY TO VERIFY SATISFACTORY OPERATION OF THE SAM-2 COUNTING SYSTEM. THIS CHECK NEED NOT BE PERFORMED PRIOR TO COUNTING SUBSEQUENT AIR SAMPLES UNLESS THERE IS REASON TO SUSPECT A PROBLEM WITH THE SAM-2 COUNTING SYSTEM. THE BACKGROUND, HOWEVER, MUST BE COUNTED PRIOR TO COUNTING EACH AIR SAMPLE.

- 3.2.14 Remove the silver zeolite cartridge with the field sample from the air sampler head and carefully wrap the cartridge in cellophane.
- 3.2.15 Place the RD22 probe next to the wrapped cartridge and press "RESET START". Record TOTAL number of counts on EP-211-4 when the count is complete.
- 3.2.16 Calculate I-131 concentration using the equation listed in EP-211-4, Part 2 and transmit the results to the FSGL.
- 3.2.17 Rebag the samples for transport back to the site for analysis.
- 3.2.18 Await further instructions from the Field Survey Group Leader.
- 3.2.19 Before returning to the site, survey self and vehicle for contamination. If contamination is found, inform the Field Survey Group Leader and take the vehicle to the designated Vehicle Decontamination Facility.
- 3.2.20 Bring all environmental samples to the Counting Room in the Radwaste Enclosure and turn them over to a member of the Chemistry Sampling and Analysis Group or as directed by the FSGL.
- 3.2.21 Place all data forms in a clean plastic bag and have a noncontaminated individual bring the bag to the Field Survey Group Leader in the TSC.
- 3.2.22 The Health Physics Technician shall inventory the field survey kit upon returning to the site and report results to FSGL.

4.0 APPENDICES

- 4.1 EP-211-1, Emergency Exposure Guidelines
- 4.2 EP-211-2, Field Survey Group Survey Record
- 4.3 EP-211-3, Field Survey Group Exposure Record

- 4.5 EP-211-5, Field Survey Group Leader Data Record
- 4.6 EP-211-6, Field Survey Checklist

5.0 SUPPORTING INFORMATION

5.1 PURPOSE

The purpose of this procedure is to provide instructions and guidelines for the actions of the Field Survey Group.

5.2 Criteria for Use

- 5.2.1 An actual or potential release of radioactive material beyond the site boundary in excess of technical specifications.
- 5.2.2 The Field Survey Group shall be activated at the Alert level or as determined by the Dose Assessment Team Leader.
- 5.2.3 The group members exposure shall be limited to the guidelines in EP-211-1, Emergency Exposure Guidelines.

5.3 Special Equipment

- 5.3.1 Radio with 2 Battery Packs
- 5.3.2 Field survey kits
- 5.3.3 Vehicle
- 5.3.4 Emergency Dosimetry (0-1500 mR and 0-5 R DRD's)

**MPC-hrs(I 131)=(Detected conc. uCi/cc I 131)(Time in Area)(1.11P8 MPC/uCi/cc)

**NOTES:

1. MPC-HOURS ARE CALCULATED USING I-131 AS THE LIMITING ISOTOPE
2. MPC-HOURS ARE ADMINISTRATIVELY CONTROLLED AT 20 MPC-HRS/WK;
Exposures >20 mpc-hrs/wk to 40 mpc-hrs/wk can be authorized by
the Personnel Safety Team Leader

	(A)	(B)	(C)		(A)	(B)	(C)	
Previous Daily Exposures				(mR) W/B				MPC-hrs.
Exposure from this entry +				(mR) W/B				MPC-hrs.
Exposure Totals				(mR) W/B				MPC-hrs.
Remaining Balance				(mR) W/B				MPC-hrs.

3. INDIVIDUALS SUSPECTED OF EXCEEDING 10 MPC-HRS/WK ARE REQUIRED TO HAVE A WHOLE BODY COUNT
4. DOSIMETRY RECORDS ARE REQUIRED FOR EXPOSURES > 2 MPC HRS/DAY,
>10 MPC HOURS/WK.

APPENDIX EP-211-4
FIELD SURVEY AIR SAMPLE DATA RECORD

Date: ___/___/___

Time: _____

Survey Team " _____ " Location _____
Sector _____

PART 1

1. Air Sample "Time On" _____
2. Air Sample "Time Off" _____
3. Air Sample Run Time _____ minutes
4. Air Sample Flow Rate _____ cfm
5. E-140N/HP-210T Background _____ cpm
6. Particulate Filter Gross Count Rate _____ cpm
7. Particulate Filter Net Count Rate _____ cpm(net)
8. AgX Cartridge Gross Count Rate _____ cpm
9. AgX Cartridge Net Count Rate _____ cpm(net)
- *10. SAM-2 Ba-133 Check source _____ Counts/2 min.
11. SAM-2 Background (clean cartridge) _____ Counts/2 min.
- *12. Ba-133 Net Counts _____ Counts/2 min.
13. SAM-2 I-131 field sample _____ Counts/2 min.

*Perform initially to verify operation of SAM-2-See NOTE, sec. 3.2.13

PART 2

Determination of I-131 Concentration

1. Air Sample Volume:
Run Time (#3) X Flow Rate (#4) = _____ cubic feet (ft³)

2. _____
(#13)(#11)

$$\left[\frac{\text{Counts} - \text{Bkg}}{2 \text{ Minutes}} \right] \left[\frac{1}{\text{Eff}} \right] \left[\frac{1}{\text{Volume}} \right] \left[\frac{1}{0.95} \right] \times 1.59N11 = \text{uCi/cc}$$

$$\left[\frac{\text{ } }{2 \text{ Min}} \right] \left[\frac{1}{\text{ } } \right] \left[\frac{1}{\text{ } } \right] \left[\frac{1}{0.95} \right] \times 1.59N11 = \text{uCi/cc}$$

PART 3

Determination of MPC Fraction (If directed by FSGL)

$$\frac{\text{E-140N} - (\text{Net CPM})}{(\text{Volume}) (18.7)} = \text{ } \% \text{ MPC}$$

APPENDIX EP-211-6
FIELD SURVEY CHECKLIST

1. BEFORE LEAVING SITE

- A) All Equipment accounted for and operable
- B) Have been briefed on situation, etc.
- C) Have Emergency Dosimetry and they are zeroed
- D) Communication check performed
- E) E520/HP270 is ON

2. AT THE SURVEY LOCATION AND WHILE IN TRANSIT

- A) Looked for and reported location where increasing radiation levels occurred while still in transit to specified survey location
- B) Performed air sample using lapel air sampler, if necessary
- C) Performed survey using E-520/HP-270 to look for maximum dose rate at waist level in 360 deg. radius
- D) Survey with E-520/HP-270 with probe shielded and unshielded
- E) Have notified FSGL of arrival and dose rate encountered
- F) If advised to take air sample:
 - 1) Particulate filter and silver zeolite cartridge marked to indicate direction of air flow
 - 2) Air Sampler head loaded with filter located outside of cartridge
 - 3) Air Sampler head oriented toward the plant and running
 - 4) Flow Rate observed and recorded
- G) If directed by FSGL, 6 inch gamma readings taken with E-520/HP-270

- H) If 6" readings higher than waist level readings, smears taken
- I) Notified FSGL that Air Sample has been pulled and advised to move to low background counting area to analyze sample
- J) E520/HP270 is ON during transit - looking for and reporting locations of maximum and minimum dose rates

3) AT LOW BACKGROUND COUNTING AREA

- A) SAM 2 set up and counting for 5 minutes to warm up
 - *B) 2 minute count of Ba-133 check source (for initial analysis only)
 - C) Remove and count particulate filter with E-140N/HP-210T
 - D) Purge Silver zeolite cartridge for 1 minute
 - E) 2 minute count of Clean Silver Zeolite cartridge
 - F) 2 minute count of Sample Silver Zeolite cartridge
 - G) I-131 Concentration calculated
 - H) All results recorded and relayed to FSGL
 - I) Advised to move to new location
 - J) If advised to return, monitor self and vehicle and relay findings to FSGL
 - K) All samples turned over to Chemistry Sampling & Analysis Group at Personnel Decon Facility in Radwaste Enclosure
 - ~~L) All forms turned over to FSGL for subsequent disposition~~
- *Perform initially to verify satisfactory operation of SAM-2 counting system only

EMERGENCY PLAN IMPLEMENTING PROCEDURE21 May
2-25-85EP-291 STAFFING AUGMENTATION1.0 PARTICIPANTS

- 1.1 Shift Clerk or other assigned person shall perform the following procedure.

2.0 ACTIONS - IMMEDIATE

- 2.1 Shift Clerk or other assigned person shall:

- 2.1.1 Ask the Emergency Director if the TSC and EOF or the TSC only is to be activated so that this information can be given to the Dose Assessment Team Leader and Communicators and what groups are to be activated for transmission to Team Leaders.

Event Classification _____

Facilities to be activated _____

TSC _____

TSC & EOF _____

Groups to be activated _____

Personnel Safety Team _____

Plant Survey _____

1st Aid/Search and Rescue _____

Vehicle and Machine Control _____

Dosimetry, Bioassay &
Respiratory Protection _____

Dose Assessment Team _____

Dose Assessment group _____

Field Survey _____

Security _____

CONTROLLED**COPY****VALID ONLY WHEN RED****PROPRIETARY**

Access Control _____
Personnel Accountability _____
Fire and Damage _____
Fire Fighting _____
Damage Repair _____
Chemistry Sampling and Analysis _____

2.1.2 Contact in sequence the personnel listed in Section 2.2.

2.1.3 Inform each person contacted of the event classification, that they are to respond to their assigned location and what groups under them are to be activated. If the person is unable to respond, go to the next person on the list.

2.1.4 Attempt to contact personnel who have pagers, by that method if they are known to be "on the page", or the phone is busy or there is no answer.

2.1.5 Inform Emergency Director of results including discrepancies.

2.2 Personnel to be contacted are:

2.2.1 SHIFT I&C TECHNICIAN

Communicator shall request that the ISC be activated.
(Shift I&C Technician ext. )

<u>I&C Technician</u>	<u>Time</u>	<u>By</u>
_____	_____	_____

PROPRIETARY

2.2.2 EMERGENCY DIRECTOR

The Station Superintendent or Assistant Station Superintendent is contacted by communicator and is one contact. Do not re-contact if he has been successfully reached.

Station Supt.
G. M. Leitch

Asst. Station Supt.
J. F. Franz

EMERGENCY PLAN IMPLEMENTING PROCEDURE

Gray
2-23-85

EP-312 RADIOACTIVE LIQUID RELEASE

1.0 PARTICIPANTS

- 1.1 Emergency Director shall have the necessary actions performed to terminate the liquid release and evaluate the consequences of the release.
- 1.2 Site Emergency Coordinator, if activated, or Emergency Director shall direct the follow-up actions of notification of downstream water users and river sampling, if required.

2.0 ACTIONS-IMMEDIATE

- 2.1 Emergency Director shall:
 - 2.1.1 Direct the immediate steps necessary to terminate the discharge to the river.
 - 2.1.2 Direct the Chemistry Sampling and Analysis Team Leader to initiate sampling of the blowdown line in accordance with EP-236, Obtaining Blowdown Line Water Samples Following Radioactive Liquid Release After Accident Conditions.
 - 2.1.3 Direct the Dose Assessment Team Leader to estimate dose projections from the ingestion of drinking water and fish in accordance with EP-317, Liquid Release Dose Calculation Method for Drinking Water and EP-319, Fish Ingestion Pathway Dose Calculation, respectively.
- 2.2 Site Emergency Coordinator, if activated, or Emergency Director shall:
 - 2.2.1 Based on results of estimated dose projections for downstream water users and fish ingestion, direct his communicator to notify the Department of Environmental Resources.

A.

CONTROLLED
COPY
VALID ONLY WHEN RED

B.
C. (Regional Office)

- 2.2.2 If requested by the Department of Environmental Resources, direct his communicator to notify the downstream domestic water users in EP-287, Nearby Public and Industrial Users of Downstream Waters.
- 2.2.3 If necessary, direct the HP&C Coordinator to activate and request the Environmental Sampling Coordinator to assign personnel to sample the river water near the intake for the following water companies sampled at the appropriate time based on the Estimated Transit Time for that location.

The Estimated Transit Time is the time required for the material released to reach the location of interest.

	<u>Location</u>	<u>Estimated Transit Time (hrs)</u>
A.	Citizens Utilities Home Water Company-Royersford	1.5
B.	Phoenixville Water	10
C.	Philadelphia Suburban Water	16
D.	Norristown Water	27
E.	Philadelphia Belmont Water	50

- 2.2.4 Direct the Chemistry Sampling and Analysis Team Leader and/or Environmental Sampling Coordinator to transmit the sampling results back them.
