Subject: NRC Response Technical Manual Training Session

Dear Sir:

Florida Power Corporation (FPC) has been in discussion with Mr. Aby Mohseni of your staff concerning his providing a one day training session (approximately 6-hours in length) at CR-3 on the NRC Response Technical Manual. It is requested that he provide this training the week of May 20, 1996.

This training will offer excellent information on accident management as well as preparation for our NRC-participation exercise in October 1996. All participants will have technical backgrounds. Many of the attendees fill key technical and/or decision-making roles within FPC's emergency response organization.

We appreciate Mr. Mohseni's willingness to provide this training. If needed, please contact Mr. John Stephenson, FPC's Manager, Radiological Emergency Planning at (352) 563-4522.

Sincerely,

Larry C. Kelley, Director  
Nuclear Operations Site Support
