Dear Mr. Martin:

River Bend Station Unit 1
Docket No. 50-458
Final Report/DR-212

Gulf States Utilities Company has completed its evaluation of DR-212 concerning flammable spacers used between the individual cells of the safety-related battery banks. Since the spacer material is suitable for its intended purpose, GSU has therefore determined this condition is not reportable under 10CFR50.55(e).

Sincerely,

J. E. Booker
