Office of Nuclear Reactor Regulation
Attn: J. F. Stolz, Chief
Operating Reactor Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

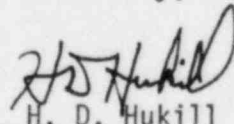

Dear Mr. Stolz:

Three Mile Island Nuclear Station Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
Emergency Operating Procedure (EOP) Upgrade Program
Response to SER Questions (NUREG 0737, Item 1.C.1)

Our letter of September 28, 1984 stated that a response to Questions 12 and 13 of the Safety Evaluation Report (SER) for TMI-1's Plant Specific ATOG Procedures Generation Package would be delayed until the first quarter of 1985. This delay was necessary in order to use the results of the steam generator tube rupture analysis being prepared by the Electric Power Research Institute (EPRI).

It appears that the EPRI report is further behind schedule and we need to revise our commitment date for providing a response to NRC. We expect to provide our response in August, 1985.

Sincerely,

H. D. Hukill
Director, TMI-1
