Commissioners
U.S. Nuclear Regulatory Commission
1717 H Street, N.W.
Washington, D.C. 20555

50-322 OL-4

Dear Commissioners:

SERVED DEC 10 1984

I am a Suffolk County legislator, and I demand that the NRC hold an oral argument in the Shoreham low power proceeding so that the interests of the citizens of Suffolk County can be fully represented before you.

Previously, the Commission has considered a low power license only when there has been no outstanding issues which could preclude the issuance of a full power license. In the Shoreham case, as you are aware, the emergency preparedness contentions remain unresolved. Under such circumstances, how can the Commission grant a low power license for Shoreham? How can the Commission contemplate this matter in the absence of a public proceeding?

Shoreham is too important a case for the NRC to give the people of Suffolk County anything less than the fullest and fairest opportunities to present their case. There is no acceptable reason for the NRC to deny Suffolk County the right to present an oral argument against the issuance of a low power license for Shoreham.

Sincerely,

Wayne Prospect
County Legislator
