Environmental Evaluation

Construction of the Batch Waste Release Tanks will disturb approximately 0.07 acres of land immediately adjacent to the plant southwest corner of the Radwaste Building. This area was previously disturbed during construction of the plant. No vegetation, mammal, bird or herpetofaunal populations exist in the area. In addition, no historic or archaeological sites exist in the area. Therefore, land-use, terrestrial and aquatic ecology, and historic and archaeological impacts due to construction of the tanks will not exceed estimates given in the Environmental Impact Statements.

All measurable nonradiological environmental effects are confined to the on-site areas previously disturbed during site preparation and plant construction. Therefore, in accordance with Appendix B to Operating License, construction of the tanks does not constitute an unreviewed environmental question.
