Docket Nos. 50-348
50-364

Director, Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Mr. S. A. Varga

Joseph M. Farley Nuclear Plant (FNP) - Units 1 and 2
Licensing Items Requiring
NRC Approval

Gentlemen:

Attached for your information is an updated status of 1984 licensing items identified in Alabama Power Company's letter dated November 6, 1984. This attachment is tabulated chronologically by Alabama Power Company's requested NRC approval date. Alabama Power Company is ready to discuss modifications to this status to address all licensing issues.

Alabama Power Company acknowledges and appreciates the recent NRC efforts to complete licensing action on items 21, 22, 23, 24 and 25 of the attached list. There remains, however, two items which are still required to support the upcoming Unit 2 refueling outage which is scheduled to start January 4, 1985. NRC staff action is requested in accordance with the attached list for these two items.

If you have any questions, please advise.

Yours truly,

R. P. McDonald
