SUBJECT: Virgil C. Summer Nuclear Station  
Docket No. 50/395  
Operating License No. NPF-12  
I&E Bulletin 83-03

Dear Dr. Grace:

South Carolina Electric and Gas Company (SCE&G) responded to IEB 83-03 on June 8, 1983. It was noted in the response that two check valves (XVC-3119A and XVC-3119B) were found to be applicable and that the valves would be tested by the end of the scheduled refueling outage. Testing of the valves was performed on December 8, 1984, and verified to be acceptable.

I declare the statements and matters set forth herein are true and correct to the best of my knowledge, information, and belief.

Very truly yours,

O. W. Dixon, Jr.
