RE: Catawba Nuclear Station, Unit 2  
Docket Nos. 50-414  
Significant Deficiency No. 414/85-02

Dear Mr. O'Reilly:

Our corrective action for this deficiency was to include an examination of the inside of the Unit 2 SIS Accumulator Tanks. This inspection was to be completed by March 15, 1985 with a final report to be submitted by March 26, 1985. We have been prevented from completing the inspection due to system testing. This inspection has been rescheduled for the week of the 25th of March. Barring any further delays, the final report will be submitted by April 30, 1985.

Very truly yours,

*H.B. Tucker*
