

UNION ELECTRIC COMPANY

1901 Gratiot Street, St. Louis

Donald F. Schnell
Vice President

March 26, 1985

Mr. Harold R. Denton
Director of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

ULNRC- 1074

DOCKET NUMBER 50-483
CALLAWAY PLANT UNIT 1
FACILITY OPERATING LICENSE NPF-30
PHASE II ARCHAEOLOGICAL INVESTIGATION

Pursuant to Section 4.3 of Appendix B to Facility Operating License NPF-30, enclosed are five copies of the report "Phase II Testing at Sites 23CY-20, 23CY-352, 23CY-359, Union Electric Company's Callaway Nuclear Power Plant, Callaway County Missouri". This report is the product of the Phase II archaeological investigation of three sites at Callaway. These three sites were investigated using Phase I testing techniques and were determined to be potentially eligible for nomination to the National Register of Historic Places (NRHP). These sites also fell within the area of potential environmental impact at the Callaway Plant. Therefore, these sites were tested using Phase II archaeological techniques to determine their NRHP eligibility.

Our consultant, American Resources Group, has determined that these sites are eligible for nomination to the NRHP. Copies of the enclosed report and completed site nomination forms have been sent to the Missouri State Historic Preservation Office (SHPO). A copy of the transmittal letter to the SHPO is enclosed.

No adverse impacts due to operation and maintenance of the Callaway Plant are foreseen for these sites. These sites, as well as all other sites that were determined to be potentially significant during the Phase I study, will be protected according to the Callaway Cultural Resource Management Plan. This report was forwarded to your office in late May of 1984.

Very truly yours,

8504180361 850326
