**Subject: Beaver Valley Power Station, Unit No. 1 and No. 2
BV-1 Docket No. 50-334, License No. DPR-66
BV-2 Docket No. 50-412, License No. NPF-73
Typed Pages for Technical Specification Change Request Nos. 223 and 94**

Typed, final technical specification pages for Technical Specification Change Request Nos. 223 and 94 are enclosed as Attachments B-1 and B-2, respectively. Also, summary descriptions of non-intent editorial changes which have been incorporated into the specifications are provided in Attachments A-1 (Unit No. 1) and A-2 (Unit No. 2).

The enclosed technical specification pages have been amended to reflect non-intent editorial changes. The changes denoted in Attachments A-1 and A-2 are the result of a conference call, conducted on March 4, 1996, between the NRC and members of my staff, concerning the change request noted above. This submittal represents the revised proposed wording to resolve the NRC reviewer's concern on the original proposed wording submitted on December 15, 1995. In addition, minor non-substantive format changes have been incorporated in this submittal that have no effect on the intent of the technical specification requirements.

If you have any questions regarding the attached information, please contact Mr. G. S. Sovick at (412) 393-5211.

Sincerely,

Sushil C. Jain
