File No. G9.5, G9.8.6.2

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

River Bend Station - Unit 1
Docket No. 50-458

In response to the NRC Staff Request for Additional Information - Hydrogen Control (letter from A. Schwencer to W. J. Cahill dated September 6, 1984), Gulf States Utilities Company (GSU) is participating with the Hydrogen Control Owners Group (HCOG) to generically address the use of the CLASIX-3 computer code in determining environmental conditions for equipment survivability evaluation. HCOG has scheduled a generic plan submittal to provide information on the CLASIX-3 computer code by the middle of December 1984. The plan will include any programs and schedules for providing requested information. GSU will review this plan when submitted and indicate the extent of endorsement as well as provide any required plant specific information by January 11, 1985.

Sincerely,

J. E. Booker
