Subject: McGuire Nuclear Station, Units 1 and 2
Docket Nos. 50-369 and 50-370
Proposed Technical Specification Change

Gentlemen:

Pursuant to 10 CFR 50.4 and 50.90, attached is a proposed license amendment to Appendix A, Technical Specifications, of Facility Operating Licensees, NPF-9 and NPF-17 for McGuire Nuclear Station Units 1 and 2, respectively.

The proposed change would delete the Flow Monitoring System from Technical Specification 3.4.6.1 and its associated surveillance requirements.

Attachment 1 contains the proposed Technical Specification change. Attachment 2 contains the background and justification for the proposed change. Attachment 3 contains the analysis performed in accordance with the standards contained in 10 CFR 50.92, which concludes that the amendment does not involve a Significant Hazards Consideration. Attachment 4 contains the Environmental Impact Analysis. The proposed amendment has been reviewed by the McGuire Plant Operations Review Committee and the Nuclear Safety Review Board and has been determined to have no adverse safety or environmental impact.

Pursuant to 10 CFR 50.91(b)(1), a copy of this amendment request is being provided to the appropriate North Carolina state official.

Should there be any questions concerning this proposed amendment or if additional information is required, please contact Kay L. Crane at (704) 875-4306.

Very truly yours,

T. C. McMeekin, Vice President
