NPF-7

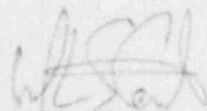

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNITS 1 AND 2
RESPONSE TO REQUEST FOR ADDITIONAL INFORMATION
SETTLEMENT MONITORING
TAC NOS. M82916 AND M82917

Virginia Electric and Power Company submitted a request for a license amendment on October 2, 1989 (Serial Number 89-682) to revise our Settlement Monitoring Program for Class 1 Structures. By letter dated April 7, 1992, the NRC requested additional data on the latest surveys addressing the settlement points affected by the license amendment request.

Attached is the data for the settlement monitoring surveys that have been performed since the October 2, 1989 submittal through April 1992. To facilitate your review, we have included the data in a format similar to the original submittal.

Very truly yours,

W. L. Stewart
Senior Vice President - Nuclear
