ATTENTION: T. R. QUAY

SUBJECT: QUALITY ASSURANCE REQUIREMENTS FOR AP600 RTNSS
SYSTEMS, STRUCTURES, AND COMPONENTS

Dear Mr. Quay:

In the Draft Safety Evaluation Report (DSER) for the AP600, the staff requested that the QA applied to RTNSS should be comparable to that described in Generic Letter 85-06 for ATWS, as well as Regulatory Position 3.5 and Appendix A of RG 1.155 for non-safety-related station blackout equipment (DSER open item 17.1.3-1). Westinghouse is preparing a QA program requirements document, based on these standards, for use in RTNSS SSC procurements. The requirements that are to be included in this document are included for information as Attachment 1 to this letter.

Please contact John C. Butler on (412) 374-5268 if you have any questions concerning this transmittal.

Brian A. McIntyre, Manager
Advanced Plant Safety and Licensing
