JOHN D. SIEBER
Vice President - Nuclear Group

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Subject: Beaver Valley Power Station, Unit No. 1 and No. 2
BV-1 Docket No. 50-334, License No. DPR-66
BV-2 Docket No. 50-412, License No. NPF-73
BVPS Physical Security Plan (PSP)

Enclosed is Revision 15 to Issue 4 of the Beaver Valley Power Station Physical Security Plan (PSP). Revision 15 changes include:

1. The revised temporary structure layout within the Protected Area since the Unit 2 Third Refueling Outage is completed.
2. A title change for our former "DLC Security Operations Supervisor" to Director of Security Operations.
3. A minor editorial change to the Security Screening Program as requested by the NRC. The program will now be referred to as an Access Authorization Program to be more consistent with utilities industry-wide.
4. A spelling correction for the test sample related to Explosives Detector Search (F Nitrotoluene).

These changes have been reviewed and judged not to constitute a degradation to the previous commitments in the PSP.

These changes, since they do not decrease the safeguards effectiveness of the Physical Security Plan, are being submitted in accordance with 10 CFR 50.54(p).

The enclosed materials are considered proprietary under the provision of 10 CFR 2.790(d), and Safeguards Information under the provisions of 10 CFR 73.21, and thereby exempt from public disclosure.
