Dear Mr. Collins:

This letter addresses the August 24, 1984 completion date for the NRC emergency preparedness appraisal finding item 8308-118, operator walk-throughs of the Radiation Monitoring System. The walk-throughs have been completed for all operators. The walk-throughs were completed prior to August 24, 1984 with the exception of one operator who, due to an unavoidable conflict between the training schedule and his vacation, did not complete the training until August 30, 1984.

Very truly yours,

K.W. Cook
