Richland, WA 99352-0968

**SUBJECT: COLUMBIA GENERATING STATION – CORRECTION OF ISSUANCE OF
AMENDMENT NO. 256 RE: REMOVAL OF LICENSE CONDITION 2.C.(11)
AND ATTACHMENT 3 FROM THE RENEWED FACILITY OPERATING
LICENSE (EPID L-2019-LLA-0068)**

Dear Mr. Sawatzke:

On March 10, 2020 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML20037A733), the U.S. Nuclear Regulatory Commission (NRC) issued Amendment No. 256 to Renewed Facility Operating License (RFOL) No. NPF-21 for Columbia Generating Station. The amendment was issued in response to Energy Northwest's application, dated March 27, 2019 (ADAMS Accession No. ML19086A315).

The amendment removed License Condition 2.C.(11), "Shield Wall Deferral (Section 12.3.2, SSER #4, License Amendment #7)," and its related Attachment 3, "List of Shield Walls," from the Columbia RFOL because these items were outdated and no longer applicable to Columbia's operation.

Subsequent to the issuance of the amendment, the NRC staff identified that the footnote on RFOL page 4 was not deleted as originally requested in the application dated March 27, 2019. The NRC concludes that this error was inadvertently introduced during the preparation of the amendment.

Accordingly, we are enclosing a corrected page 4 of RFOL No. NPF-21 for Amendment No. 256 that was issued by letter dated March 10, 2020. Please replace this page in your copy of the license amendment.

This correction does not affect the NRC staff's overall conclusions associated with the approval of Amendment No. 256.

The NRC staff regrets any inconvenience this may have caused. If you have any questions regarding this matter, please contact me at (301) 415-5136 or via e-mail at John.Klos@nrc.gov.

Sincerely,

/RA/

L. John Klos, Project Manager
Plant Licensing Branch IV
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

CORRECTED PAGE 4 TO RENEWED FACILITY OPERATING LICENSE NPF-21
FOR AMENDMENT NO. 256

(2) Technical Specifications and Environmental Protection Plan

The Technical Specifications contained in Appendix A, as revised through Amendment No. 254 and the Environmental Protection Plan contained in Appendix B, are hereby incorporated in the renewed license. The licensee shall operate the facility in accordance with the Technical Specifications and the Environmental Protection Plan.

- a. For Surveillance Requirements (SRs) not previously performed by existing SRs or other plant tests, the requirement will be considered met on the implementation date and the next required test will be at the interval specified in the Technical Specifications as revised in Amendment No. 149.
