Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555
Attn: Docketing & Service Branch

Dear Sir or Madam Secretary:

Please accept this as written request for a public hearing on the Federal Register Docket # 50-336, which requests an amendment to the operating license at the Millstone Nuclear Power Station, Unit 2 at Waterford, Connecticut. This docket was on pp. 17934 and 17935 in the Federal Register dated April 28, 1992.

On behalf of the environmental group, EARTHVISION, Inc., I hereby request that you grant the opportunity for a public hearing on this matter. Given the numerous safety problems and violations at Millstone in the recent past, it would be in the best interest of both Northeast Utilities as well as the welfare of the citizens of this area that the licensee provide background information to the public as to the need for AND the safety of said amendment.

I thank you for your attention.

For Our Earth,

Patricia R. Nowicki
Associate Director,
EARTHVISION, Inc.
