

BEFORE THE ATOMIC SAFETY AND LICENSING BOARD

Docket No. 50-400 OL

SS:

2. Through the Division of Emergency Management, I have directed the State's response to more than 650 emergency cases in the last year alone, including the tornadoes in March and Hurricane Diana in September. In my professional capacity, I

have been involved in the development of the off-site emergency response capability for the Shearon Harris Nuclear Power Plant as well as the Catawba, McGuire and Brunswick nuclear plants. A current statement of my professional qualifications and experience is attached hereto as Attachment 1.

3. One of the primary responsibilities of the Division of Emergency Management as set forth in the state Emergency Response Plan (ERP) for the Harris Plant is the preparation and maintenance of that plan. Part 1, Section V.B.3. of the ERP lists the hospitals which will support the plant and surrounding communities in the event of radiological emergencies. Of those hospitals, Duke University Medical Center and North Carolina Memorial Hospital may be considered regional facilities from the standpoint that they provide medical treatment for patients from across North Carolina and the southeastern United States.

4. I have reviewed the affidavits of Dr. Fred A. Mettler, Jr. and Dayne H. Brown as to the capabilities both of the hospitals listed in the ERP and of the Oak Ridge REAC/TS unit to treat cases of severe radiation exposure per se. The Division of Emergency Management will proceed to include that information in the NC ERP.

Jesse T. Pugh, III

Subscribed and sworn to before me
this 2 day of January, 1985.
