Docket No. 50-267

SUBJECT: **10 CFR 50.59 ANNUAL REPORT SUBMITTAL**

REFERENCES: 1) Facility Operating License No. DPR-34  
2) NRC Letter, Erickson to Crawford, dated May 21, 1991 (G-91106)  
3) PSC Letter, Crawford to Document Control Desk, dated July 22, 1991 (P-91230)

Gentlemen:

This letter transmits the Annual Report of Changes, Tests, and Experiments affecting the Fort St. Vrain (FSV) Station pursuant to Part 50.59(b) of Title 10, Code of Federal Regulations. This report covers the period of January 23, 1991 through January 22, 1992.

The Nuclear Regulatory Commission (NRC) issued Amendment No. 82 (Ref. 2) to Facility Operating License No. DPR-34 for the FSV Nuclear Generating Station. This amendment modified License No. DPR-34 to possession only status. With issuance of the possession only license (POL), the Updated Final Safety Analysis Report (FSAR) is no longer required to be updated since 10 CFR 50.71(e) only applies to those nuclear power reactors licensed to operate (Ref. 3). Therefore, the Updated FSAR and Fire Protection Program Plan (which is part of the FSAR by reference) are not being submitted with the annual 10 CFR 50.59 report, as has been the case in previous years.
