ABSTRACT (Limit to 1400 spaces, i.e., approximately fifteen single-space typewritten lines) (18)

During normal full power operation, ECCS area ventilation fan HVE-9B was inadvertently placed out of service for maintenance while its redundant fan (HVE-9A) was already administratively out of service because the 1A diesel fuel oil storage tank was below its tech. spec. minimum level. This tech. spec. 3.0.5 situation was recognized and corrected within one hour by re-turning HVE-9B to service. The health and safety of the general public was not affected by this event.
