

UNION ELECTRIC COMPANY

1901 Gratiot Street, St. Louis

Donald F. Schnell
Vice President

January 22, 1985

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Denton:

ULNRC- 1027

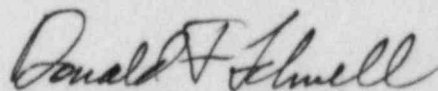

DOCKET NUMBER 50-483
CALLAWAY PLANT, UNIT 1
GENERIC LETTER 84-24, 10CFR50.49 COMPLIANCE
Reference: Generic Letter 84-24 dated December 27, 1984

The referenced generic letter concerned certification of compliance to 10CFR50.49, environmental qualification of electrical equipment important to safety for nuclear power plants. This letter required each licensee of an operating reactor to respond within 30 days, certifying their degree of compliance to 10CFR 50.49.

Union Electric did not receive this letter until January 14, 1985 and therefore requests an extension to respond 30 days from receipt of the letter (i.e., February 13, 1985). With the recent issuance of the Callaway Facility Operating License, the status of the Callaway EQ program is well documented with the NRC Staff and the extension should not be a problem.

If there are any questions, please contact us.

Very truly yours,

Donald F. Schnell
