PLANT HATCH - UN 2
NRC DOCKET 50-66
OPERATING LICENSE NPF-5
REVISION OF UNIT 2
CORE OPERATING LIMITS REPORT

Gentlemen:

Enclosed is Revision 1 to the Plant Hatch Unit 2 Core Operating Limits Report (COLR) for Cycle 10 which imposes a Maximum Average Planar Linear Heat Generation Rate (MAPLHGR) penalty while operating above 63 percent of rated thermal power. The penalty was imposed in response to an issue related to the potential for a complete loss of feedwater heating. The MAPLHGR power factor (MAPFAC_p) graph in the COLR (Figure 3-2) has been revised accordingly. The issue is not applicable to Unit 1.

The revised COLR should be used for the remainder of Plant Hatch Unit 2, Cycle 10.

If there are any questions concerning this report, please contact this office.

Sincerely,

J. T. Beckham, Jr.

OCV/cr
